SKILLS

FRONTEND

React TypeScript Next.js

Tailwind CSS Accessibility

BACKEND & DATA

Node.js PostgreSQL

GraphQL Redis Python

AI / LLM

Claude API RAG Evals

CLOUD & DEVOPS

AWS Docker Terraform

GitHub Actions

PRACTICES

API Design Mentorship

Design Reviews

EDUCATION

B.S. Computer Science
Texas State University · 2017

CERTIFICATIONS

AWS Certified Developer – Associate
Amazon Web Services · 2023

Alex Rivera

● FULL STACK DEVELOPER & SYSTEMS ADMINISTRATOR

PROFILE

Senior Full Stack Engineer with 7+ years building production web applications across React, TypeScript, Next.js, Node.js, and PostgreSQL. At Freightline, led platform rebuilds and shipped LLM-powered features in the logistics domain — directly aligned with Northwind Labs' supply-chain visibility mission. Experienced mentor and technical lead who drives performance, accessibility, and engineering quality through design reviews and rigorous evaluation practices.

AI & TOOLING

Ships LLM features in production (retrieval, structured outputs, evals); daily user of AI coding assistants with a review-first workflow.

EXPERIENCE

Senior Full Stack Engineer

2022 – Present

Freightline

- Shipped an LLM-powered freight-quote assistant using retrieval over 200K past quotes, with an eval suite gating every release — directly applicable to productionizing LLM insights in a supply-chain context.
- Designed a GraphQL gateway consolidating 6 backend services, cutting frontend API calls per page by 60% and improving platform scalability.
- Led a 4-person team rebuilding the shipper dashboard in Next.js and TypeScript; reduced page load times from 4.1s to 1.3s.
- Mentored 3 junior engineers and introduced RFC-based design reviews, raising engineering quality and team alignment across the organization.

Full Stack Engineer

2019 – 2022

Brightpath Health

- Built and shipped patient-scheduling features in React and Node.js, adopted by 40 clinics in production.
- Migrated a monolith's reporting module to a PostgreSQL read replica, eliminating nightly timeout failures and improving data reliability.
- Owned end-to-end WCAG 2.1 AA accessibility remediation across the patient portal, raising the bar on frontend quality and inclusivity.

Software Engineer

2017 – 2019

Cobalt Agency

- Delivered 12 client-facing web applications in React and Express on fixed timelines, demonstrating consistent full-stack execution.
- Established the agency's first CI pipeline and Docker-based development environments, improving team velocity and deployment consistency.

SELECTED PROJECTS

► **promptdiff** — TypeScript, CLI

CLI tool that diffs LLM outputs across prompt versions for regression testing, enabling structured evaluation of model behavior changes.

► **Trailmix** — Next.js, Mapbox, PostgreSQL

Open-source trip planning application with 1.2K GitHub stars, featuring geospatial data, interactive maps, and a PostgreSQL backend.
